### Workshop Description

Are you a CTE director, administrator, or curriculum leader in charge of your organization's CTE curriculum model? Or maybe your organization does not have a standard CTE curriculum model, but you want to lead and implement one. The PACTA Collaborative CTE Curriculum Model Workshop will be a facilitated session where schools can introduce and share their CTE curriculum models and the process they utilize to lead and facilitate technical teachers' development and implementation of high-quality CTE curricula. A quality technical program curriculum empowers CTE teachers to effectively plan and deliver lessons that spark active student engagement and achievement. As a result, students are able to learn and demonstrate their technical mastery of content and skills.
